

2023 Farmington Drumline

Audition Information

You have taken the first steps to becoming a member of the Farmington Phoenix Drumline! We pride ourselves in being one of the finest high school drumlines in the country and are very excited to have you as part of our team. Here at Farmington, you will make life-long friends, memories, and be a part of the ever growing legacy of the Marching Phoenix.

This packet is meant to help and prepare you for your amazing experience here at Farmington. Read all provided information carefully as it is meant for your benefit!

We are here to help. Don't be afraid to reach out with any questions you may have! You can contact our percussion staff at the emails below:

Jake Harker (Battery Head)
jacob.harker.8@gmail.com

Cartson Gowans (Front Ensemble Head)
carston.gowans@gmail.com

Audition Dates:

04/11 - Clinic

04/13 - Clinic

04/18 - Clinic

04/20 - FINAL AUDITION

PHILOSOPHY

APPROACH

- Relaxed Velocity - sound quality at all dynamic levels, speed, endurance.
- Touch - flow, articulation (tap/accents control), musicality, feel.
- Independence - knowing individual hands responsibility in rudiments, musical passages, breakdowns and quality between hands.

GRIP

- Stable, consistent and focused grip that is not too tight or too loose.
 - A good way to test this is to take two sticks and hit them together while squeezing them as hard as you can. Do you hear a thin choked off sound? Now start hitting the sticks together and gradually start to loosen your grip. Did you hear the sticks start to produce a more open tone? If you hold the stick too tightly, you dampen the stick's natural vibrations and "choke off" much of the sound, leaving you with a very thin quality. Also, the brunt of the impact from the stick striking the drum will be transferred directly into your hand, which can lead to unnecessary injury.
- All your fingers will be in constant contact with the stick, but will never squeeze or choke off the resonance of the stick.

TENORLINE PLAYING ZONES REFERENCE CHART

TENORLINE CROSSOVERS

- It is important to note that to achieve the best sound on a crossover, one should change as little as possible about their technique from the feeling of performing a passage on one drum.
- The thumb crossover is performed directly at the thumbs or fulcrum. This is used for smaller crossovers.
- The wrist crossover is performed directly where the wrist turns to execute a stroke. This is used for larger crossovers.

TENORLINE LATERAL/VERTICAL MOVEMENT

In order to play around the tenor drums, two types of movements are necessary:

- Vertical movement is provided by the up and down motion of the wrist, finger, arm, etc. (Y-axis).
- Lateral movement is provided by the side to side motion of the forearm (X-axis).
- Vertical movement is the first priority when learning any passage on the tenors.

TENORLINE DOUBLE STROKE SCRAPE ZONES

Scrapes, or sweeps, are multiple one-handed notes moving from drum to drum. To help with ease around the drums, alternate zones may be utilized. These zones are based on efficiency, minimizing the space between each double. These zones are primarily used at high speeds, and the ultimate goal is to get a great sound while avoiding rims.

STROKE TYPES

- Key Points:
 - Every stroke will initiate from a wrist turn with the head of the stick moving first. Even when playing 18 inches, a wrist turn will lift the head before the arm rises. This wrist turn is essential to every stroke played. However, do not restrict your arms by trying to use only the wrist. As your wrist turns, your arm should naturally move. Use any combination of muscle groups (arm, wrist and fingers) to your advantage to produce any stroke. Also, there should be relaxed/rebounded weight to your stroke in order to produce a big, full sound.
- Full-stroke
 - Practice by bouncing a basketball.
 - The ball is always moving and never stops.
- Down-stroke
 - No extra tension is required. The beginning of the stroke is the exact same as the full-stroke. The only difference is after the stick strikes the head, your fingers act as a relaxed barrier, preventing the stick from rebounding past 3 inches. It is important not to over-squeeze the stick when stopping it close to the head. If properly relaxed, the skin on your forearm should have a natural jiggle. It is also important not to add extra velocity to the down stroke. A great exercise to test this is to play a measure of legato eight notes immediately followed by a measure accenting the downbeat only. Did the sound change? If so, you are probably adding extra velocity to your downstroke or squeezing the stick before it makes contact with the head.
- Up-stroke
 - Anticipating transitions is key for timing and making sure that you are using the correct muscle groups/technique for a given musical passage.

STICK HEIGHTS

Height	Related Dynamic	Angle from the Drum	Notes
1/2"	ppp	Tacet Angle	Grace Note Height
1"	pp	<0	Softest playing dynamic
3"	P	0	Default tap height. Mainly wrist, arms and fingers aid certain material
6"	mp	22.5	Default tenuto height. Mainly wrist, again arms and fingers support naturally when needed.
9"	mf	45	Arm starts to get more involved at this height. Same principles of wrist initiation apply.
12"	f	67.5	More arm, fingers open up more to aid flexibility.
15"	ff	90	Maxed wrist motion combined with open fingers (only about 1" from palm) and natural arm support.
18"	fff	112.5	Avoid "slamming"! Snares and quads will maintain 90° angle and add more arm for a more "visual volume" effect. Bases utilize more angle change for added distance from the head.

Tenorline

Phoenix Jam!!!

HYPE!!!

Al Williams

$\text{♩} = 116$

The image displays a tenorline drum score for a piece titled "Phoenix Jam!!!". The notation is written on a single staff with a treble clef and a 4/4 time signature. The tempo is marked as 116 beats per minute. The score is divided into five systems, each starting with a measure number (1, 5, 9, 12, 15). The notation includes various drum symbols: eighth and sixteenth notes for rhythmic patterns, rests, and dynamic markings such as *ff* (fortissimo), *p* (piano), and *fff* (fortississimo). There are also articulation marks like accents (>) and slurs. The bottom of the staff features a series of letters (R, L, r, l) representing the right and left hands of the drummer. The piece concludes with a double bar line and a final *fff* marking.
